

TRAVEL REQUIREMENTS AND PREPARATION

The following provides information on the anticipated travel requirements, based on current information. As requirements are subject to change, Image Tours will provide up-dates for your reservation. Failure to provide documentation and follow regulations, as required, will be subject to the cancellation/trip interruption policies.

Documentation of COVID-19 Vaccination: You must carry your original (no copy) CDC COVID-19 Vaccination Card including your first and last name as stated on your passport and showing that you are fully vaccinated with the last dose dated at least 14 days prior to departure. Fully vaccinated means at least three doses of Pfizer or Moderna; at least two doses of Johnson and Johnson; or two doses of Pfizer or Moderna when the last dose is dated within five months of travel.

Additional Important Items to Pack:

- KN95/N95 or FFP2 Masks daily supply for duration of travel.
- Travel size hand sanitizer and disinfectant wipes to carry with you.
- A few COVID-19 self-test kits (two per person is recommended).

Bring a Mobile Phone with ear buds: A mobile phone can be extremely helpful for calls, maps, notes, alarm, photos, audio tour apps, and any online registrations required during the tour. At time of check-in, the airline requires a cell phone number and email address. Check with your mobile phone provider about short term international plans to minimize fees for calls, texts and data while outside the USA Sign up for "WhatsApp," a cost-free way to communicate over WI-FI with other WhatsApp users. Pack a USB battery pack to recharge electronic devices on the go.

Registration Prior to Departure: Follow the instructions and guidelines provided by the airline website for the most current requirements. It is a good idea to read through the information on the airline website about a month prior to departure. You may need to complete a Country Entrance Registration personally authorizing that you are fully vaccinated (as outlined above), have not been diagnosed with COVID-19 within 28 days of travel, have not had contact with someone diagnosed with COVID-19 within 14 days of travel, and do not have COVID-19 symptoms. The airline website will direct you to complete any required registration prior to check-in. Review current information and complete any required registration through the airline website 48 hours prior to your flight.

COVID-19 Testing Prior to Travel: Fully vaccinated travelers are currently not required to present a documented negative Covid-19 Rapid PCR test upon departure from the USA; but requirements are subject to change and current requirements will be stated on the airline website. Check the requirements for your reservation through the airline website a week prior to departure and when checking in for your flight 48 hours prior to departure. Even if not required, it is still a good idea to self-test or get tested within 48 hours of departure.

COVID-19 Testing During the Tour: Temperature checks or health screenings may be conducted at any time required, requested, or deemed necessary during the tour. Any costs related to testing will be at the passenger's expense. If passengers test positive or exhibit symptoms, they will need to visit a physician in order to receive documentation of diagnosis. Those who have purchased the Travel Protection Plan through Image Tours may make a claim for coverage of additional costs if the physician documents recommendation for "strict quarantine" (remaining in one location with meals/ necessities brought to you). The hotel staff, tour manager, Image Tours or the Travel Protection Plan can provide guidance on testing, physicians, accommodations and transportation.

COVID-19 Testing Prior to Return: If the USA is still requiring documentation of a negative COVID-19 Rapid test one day prior to your return flight to the USA, Image Tours will arrange a group testing option, for no more than \$50 per person, to be paid by the passenger.

HEALTH SAFETY PROCEDURES DURING THE TOUR

The safety, comfort and health of our guests and service providers is our highest priority. Therefore, we have developed procedures and guidelines to provide a safe and comfortable travel experience while complying with local requirements. As requirements are subject to change, it is important for passengers to follow the instructions and guidance of the tour manager during the tour.

Masks

1. When advised to wear masks, wear them at all times except while eating or drinking. Masks will need to be worn as local regulations require, which may include flights, airports, motor coach, public transportation, and/or interior public spaces. Image Tours expects supportive reactions to passengers who prefer to wear a mask even when not mandated.
2. Bring enough KN95/N95 or FFP2 masks for daily use for the duration of travel, as most services exclusively require this type. A limited supply of masks will be available for purchase at a cost of Euro 5 for two. If you find cloth or surgical masks more comfortable, bring a few for occasions when these are acceptable.
3. Masks with valves/respirators are not acceptable.
4. Fully cover nose and mouth

Motor Coach Hygiene and Hand Sanitizer

Drivers will provide the usual intensive daily cleaning of the coach, with sanitization of handrails and other frequent touch points at every stop. Wash or disinfect your hands frequently, including each time you depart or enter the coach. Hand sanitizer dispensers are mounted at the coach entrance. Bring travel size hand sanitizer and disinfectant wipes to carry with you. A limited supply of personal size hand sanitizer will be available for purchase for Euro 5 each.

Seat Assignments

The first row of seats must remain free of passengers. Passengers may only be allowed to enter/exit the middle door of the coach. Please exit in order of those closest to the exit to those furthest from the exit to promote maximum distancing on the coach. Although current expectations are that daily seat rotation will take place, it is possible that seat rotation may not be permitted or may be reduced to twice during the tour. The tour manager will provide guidance regarding motor coach seating during your tour.

Toilets and Comfort Stops

Frequent stops allow for additional ventilation on the motor coach and for comfortable access to restrooms. We ask that you use restrooms at the stops rather than onboard the motor coach. If you urgently need to use the onboard toilet, use sanitary wipes on handles before and after. Do not use the onboard toilet when the motor coach is at/near a rest stop or at a standstill/parked. The onboard toilet may be closed if required by regulations.

Luggage

Luggage is loaded and unloaded exclusively by the driver. Due to staffing shortages and procedure changes, there may be an occasion where taking your own luggage to your room is necessary or more convenient. If you prefer to take your own luggage, follow the driver's guidance on collecting your luggage.

Motor Coach Ventilation

The high-performance ventilation and air-conditioning systems in the motor coaches used on our tours meet the requirements necessary to rapidly exchange air (every two to four minutes).

Personal Assistive Listening Systems (P.A.L.S.)

A lightweight, hands-free assistive listening system is provided to each traveler to allow convenient and clear reception of tour manager commentary while social distancing during guided walks.
